In craps, you're betting on the outcome of a roll of two dice. The game is played on a table with a layout that looks like a diamond. The players stand around the table and place their bets in the different boxes on the layout.

The game starts with a come-out roll. The shooter rolls the dice, and the outcome of that roll determines what happens next. If the shooter rolls a 7 or 11, they win. If they roll a 2, 3, or 12, they lose. If they roll any other number, that number becomes the point.

The shooter continues to roll the dice until they either roll the point again or they roll a 7. If they roll the point again, they win. If they roll a 7, they lose.

There are many different types of bets that you can make on craps. The most common bets are:

- **Pass line bet:** This is a bet that the shooter will win the come-out roll or they will roll the point again before they roll a 7.
- **Don't pass line bet:** This is a bet that the shooter will lose the come-out roll or they will roll a 7 before they roll the point again.

- **Come bet:** This is a bet that the shooter will roll the point again before they roll a 7.
- **Don't come bet:** This is a bet that the shooter will roll a 7 before they roll the point again.
- **Field bet:** This is a bet that the shooter will roll a 2, 3, 4, 9, 10, 11, or 12 on the come-out roll.
- **Any craps bet:** This is a bet that the shooter will roll a 2, 3, or 12 on the come-out roll.

The odds of winning on a craps bet vary depending on the type of bet you're making. The following table shows the odds of winning on each type of bet:

Bet	Odds of Winning
Pass line bet	49.29%
Don't pass line bet	49.29%
Come bet	49.29%
Don't come bet	49.29%
Field bet	16.67%
Any craps bet	11.11%

The don't pass line bet is one of the most powerful bets in craps. It's a bet that the shooter will lose the come-out roll or they will roll a 7 before they roll the point again. This bet has a house edge of only 1.36%, which makes it one of the best bets in the casino.

You can use the don't pass line bet to your advantage by betting it when you think the shooter is going to lose. For example, if the shooter has rolled a 7 or 11 on their last roll, they're more likely to roll a 7 again on their next roll. This is because the dice have a "memory" and they tend to repeat the same numbers over and over again.

One of the most important things to learn when you're playing craps is how to manage your bankroll. This means setting a budget for yourself and sticking to it. It also means knowing when to walk away from the table.

If you're not careful, it's easy to lose all of your money at craps. The game is designed to be addictive and it's easy to get caught up in the excitement of the moment. But if you don't manage your bankroll properly, you're going to end up broke.

Here are a few tips for managing your bankroll:

- Set a budget for yourself and stick to it.
- Don't bet more money than you can afford to lose.
- Take breaks throughout the day to clear your head.
- Walk away from the table when you're losing.

If you're serious about winning at craps, then you need to read *72 Hours at the Craps Table*. This book is the most comprehensive guide to the game ever written. It will teach you everything you need to know to start winning big at the craps table.

Q: Is craps a difficult game to learn?

A: Craps is not a difficult game to learn, but it does take some practice to master. The basics of the game are simple, but there are many different

bets that you can make and it can take some time to learn the odds of each bet.

Q: What is the house edge on craps?

A: The house edge on craps varies depending on the type of bet you're making. The house edge on the pass line bet is 1.41%, the house edge on the don't pass line bet is 1.36%, and the house edge on the come bet is 1.41%.

Q: How much money do I need to play craps?

A: The minimum bet at a craps table is usually \$5. However, you should have a bankroll of at least \$100 to play comfortably.

Q: What is the best way to win at craps?

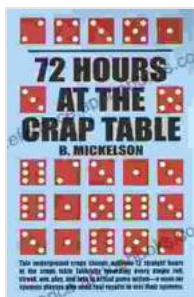

A: There is no surefire way to win at craps, but there are some things you can do to increase your odds of winning. These include:

- Learning the odds of each bet
- Managing your bankroll properly
- Taking breaks throughout the day
- Walking away from the table when you're losing

Q: Is 72 Hours at the Craps Table worth the money?

A: Absolutely! 72 Hours at the Craps Table is the most comprehensive guide to the game ever written. It will teach you everything you need to

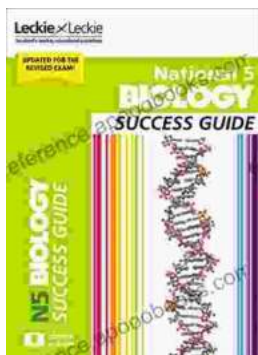

know to start winning big at the craps table.
