

Equity for the Post-Western World

Rethinking Justice and Fairness in a Globalized Era

In a world increasingly shaped by globalization, the concept of equity takes on new dimensions. The traditional understandings of justice and fairness, which were largely based on Western values and perspectives, are no longer sufficient to address the complex challenges of a globalized world. This book examines how we can rethink justice and fairness in a post-Western world, taking into account the diverse perspectives and experiences of people from all over the globe.

Dismantling Global White Privilege: Equity for a Post-Western World by Chandran Nair

The book begins by exploring the concept of equity and its relationship to justice and fairness. It then examines the challenges to equity in the post-Western world, including the rise of global inequality, the increasing interconnectedness of the world's economies, and the growing diversity of the world's population. The book also explores the opportunities for equity in the post-Western world, such as the rise of new global institutions, the

increasing awareness of human rights, and the growing demand for social justice.

The book concludes by offering a vision for a more equitable post-Western world. This vision is based on the principles of human dignity, equality, and solidarity. The book argues that we need to create a world where everyone has the opportunity to live a fulfilling life, regardless of their race, gender, religion, or nationality.
