

Of Surgeons and Transplants: Miracles and Disasters Along the Cardiac Frontier

In the realm of medicine, few procedures are as complex or as fraught with risk as heart surgery. For decades, surgeons have pushed the boundaries of what is possible in the operating room, performing intricate operations to repair damaged hearts and give new life to those who would otherwise perish.

In *Of Surgeons and Transplants*, acclaimed medical journalist David Margolick takes us on an extraordinary journey into the world of heart surgery. Through the stories of real-life surgeons and patients, he reveals the triumphs and setbacks, the hopes and disappointments, and the human drama that unfolds in the operating room.

Margolick weaves together the personal stories of pioneering surgeons like Christiaan Barnard, who performed the first human-to-human heart

transplant in 1967, and Robert Jarvik, who invented the artificial heart. He also tells the stories of patients who have undergone heart surgery, from the young child who received a new heart at the age of two to the elderly woman who underwent a heart transplant at the age of 80.

Of Surgeons and Transplants is a gripping and in-depth exploration of one of the most challenging and rewarding fields of medicine. It is a testament to the skill and dedication of the surgeons who perform these life-saving operations, and to the courage and resilience of the patients who place their lives in their hands.
