Tommy Robinson is a political lightning rod. His supporters see him as a hero, a defender of free speech and traditional values. His detractors see him as a dangerous demagogue, a threat to democracy itself.

Robinson, a former leader of the English Defence League, is one of the most prominent figures in the anti-Islam movement. He has been arrested numerous times for his inflammatory rhetoric and has been banned from social media platforms for hate speech.

In his new book, *Tommy Robinson and the Coming Civil War*, journalist Andy Ngo takes a deep dive into Robinson's world. Ngo argues that Robinson is a symptom of a larger problem, a growing sense of alienation and resentment among white working-class Britons.

Ngo writes that Robinson's followers are "a diverse group of people who have been left behind by the global economy and social changes of the past few decades." They are attracted to Robinson's message of "taking back control" and his promise to restore traditional values.

Ngo also argues that Robinson's rise is a warning sign for the United Kingdom. He writes that "the country is on the brink of a civil war" and that Robinson could be the spark that sets it off.
